Skills

FULL STACK WEB DEVELOPER.

MOBILE FIRST WEB DESIGNER.

A real people person !

I have a deep and fundamental understanding of front end web development.

Semantic Html5, Css3, jQuery, javaScript, and Ruby.

Trained in version control with git/hub and application deployment on Heroku.

Frameworks include Bootstrap and Ruby on Rails.

Right now I'm learning node.Js and Angular js.

Learning goals for the future include V.R. and A.I. development.

Experience

2014 - PRESENT Do not Contact Please :)

Huntington Beach Veterinary Hospital, H.B. Ca - Head vet technician.

- Preparing animals of all species for surgery and monitoring anesthesia.
- Preparing and running in-house dx testing.
- In-house testing including Radiological studies and cytological exams of various specimens
- Dental exams and cleanings under the supervision of a Dr.
- H.R. duties: Hiring , firing and everything in between including conflict management.

2014-2015

Southern California Veterinary Specialty Hospital, Irvine Ca - Veterinary Technician

- Supervised shifts between the hours of 6-830 pm.
- Monitored and prepared animals for surgeries and dx testing.
- Assisted every specialists at some point including E.R, Ortho, Internal medicine, neurology, and cardiology.
- Reason for leaving : I missed the relationship you have with patients and owners in the regular veterinary hospital setting .

~ 2011 - ~ 2014

Irvine Veterinary Services inc. 949 786-0990- *Veterinary Technician*

- Preparing animals for surgeries and monitoring surgeries as well.
- Diagnostic testing and submissions of lab tests to various Laboratories.

- Client education was a fundamental part of the job.
- Client services.

Education

2016- march of 2017

Career Foundry , Berlin, Germany - *Full Stack Web Developer.*

Curriculum included - Responsive Website development, Interactive Website, Consumer Based Dynamic back-end Web Store App. Deployed on Heroku with Git Version Control used on the back-end app.

A little more about me.

Before I fell in love with web development I was heading for Veterinary School. My undergrad was started and re started due to lack of motivation. I love animals and still love the career but I need a change as I had really reached the very top of the pay scale and as far as one could move before ultimately working for a university or large corp. I am a very loyal and hard worker. I never call out sick and went all through grade school without missing a day for being ill. I credit my Mother for those attributes as well as my ability to learn and teach myself ANYTHING !! I really believe that those qualities as appreciated by everyone. I will eventually complete my b.s. in computer science after completing a few more courses online. Thanks for your time !! Have a GREAT Day!
